DETAILED ACTION

Examiner's statement of reason of allowance

1. Claims 1-9, 11-20, and 22 are allowed.
2. The following is an examiner's statement of reasons for allowance:
 - a. The present invention is directed to a recording medium that have high data secrecy and restoration against out-of – synchronization of data.
 - b. The closest prior art, as previously recited,
Lynn et al (US5345508), is directed to a method and apparatus for variable-overhead cached encryption.
Gligor lee et al (US2002/0048364), is directed to a parallel block encryption method and modes for data confidentiality and integrity protection,
Jaechul et al (Concrete security analysis of CTB-OFB and CTR-CFB modes of Operation), is directed to a symmetric encryption and provided a concrete security analysis of the XOR, CTR, and CBC schemes, are generally However, none of Lynn , Gligor, Jaechul, teaches or suggests, alone or in combination, the particular combination of steps or elements as recited in the independent claims 1,9,11,12,20, and 22. For example, none of the cited prior art teaches or suggest the steps of *"a path that inputs a part or all the encrypted data that are output from the calculation means to the hold means; wherein the encryption means reads in parallel the data held by the hold means, one or a plurality of the count values, and a key outputted by the signal*

generation means; and wherein the input data is sequentially inputted to the calculation means in predetermined unit, and the data held by the hold means is reset in each predetermined unit so that data in a preceding unit of the input data is excluded from affecting encryption of a current unit of the input data."

Therefore the claims are allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
